

What's so eco-friendly about BREASTFEEDING

1

RENEWABLE

Breastmilk naturally replenishes itself.

2

PERFECTLY PACKAGED

It's produced and delivered straight from the bosom - which means no waste.

3

TOXIC-FREE

It's literally made from mother's best.

4

NATURAL RESOURCE

Feel confident in knowing Mother Earth is better off, simply by using what we naturally have.

5

WE ARE MOTHER NATURE

Breastmilk is the healthiest option for the entire family. And so healthier people make for a healthier ecosystem.

6

CONSERVES ENERGY

Mother's milk is always available - no preparation or fancy gadgets needed.

7

HEALTHY HABIT

Breastfeeding is a lifestyle that gives the current and future generations a specific way to be kinder to our planet.
